

Lesson 01 Demo 02

Using Images

Objective: To work using images

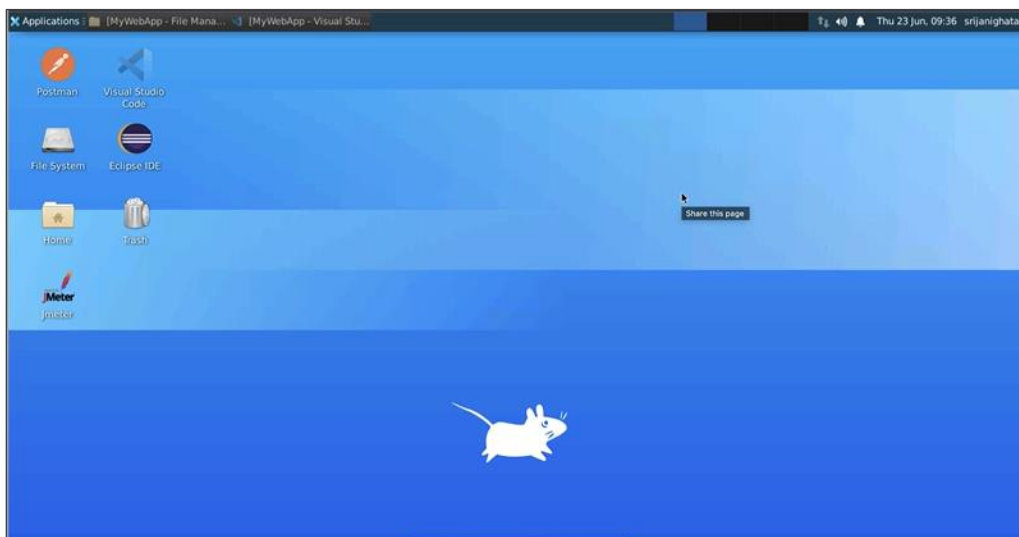

Prerequisites: Visual Studio Code

Steps to be followed:

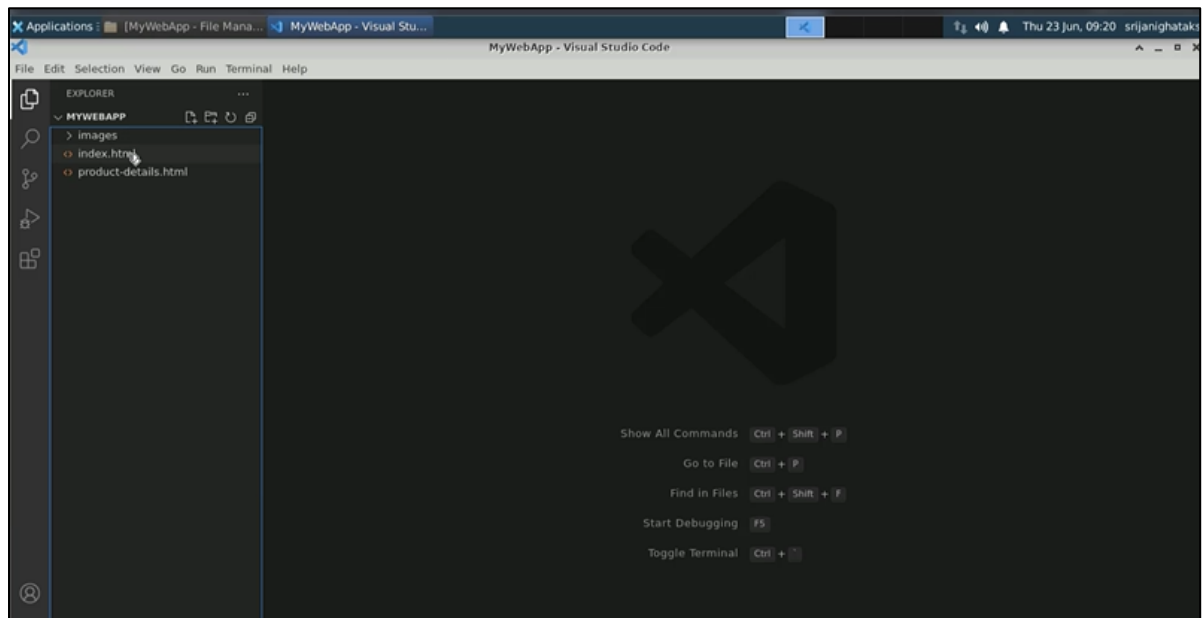

1. Checking the images under Images and checking the images under Images
2. Creating a new web page and adding code to the new html page
3. Updating the product-details.html page

Step 1: Opening Visual Studio and checking the images under Images

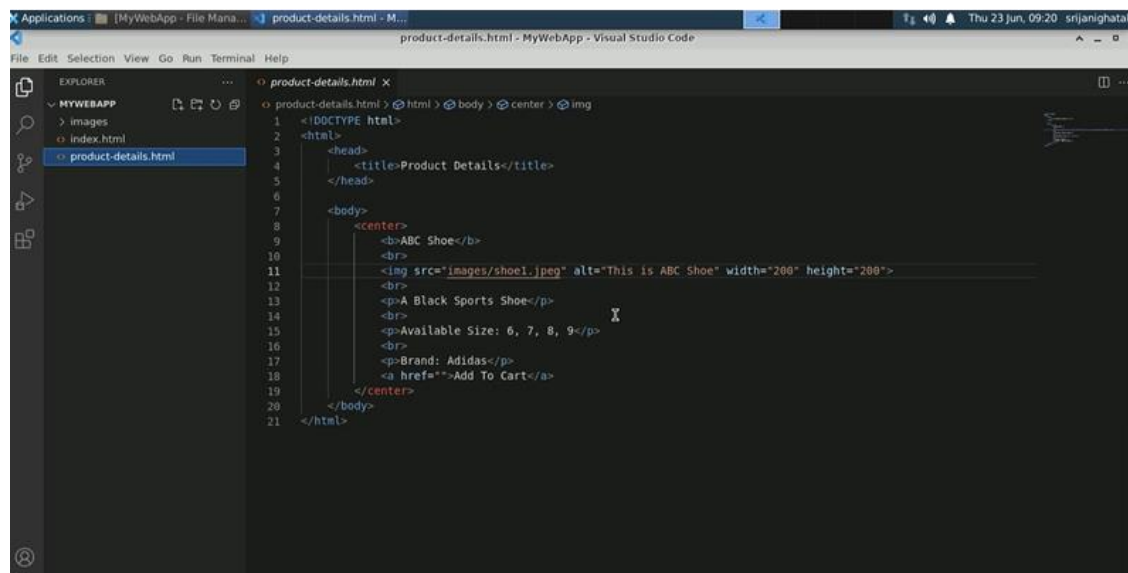

1.1 Double-click on the Visual Studio icon.

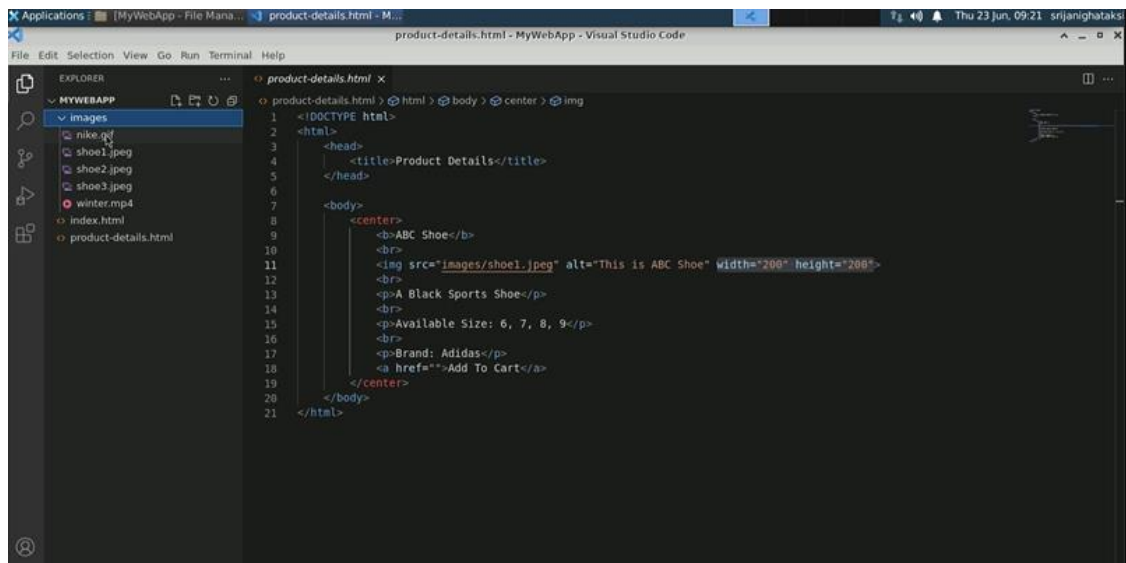

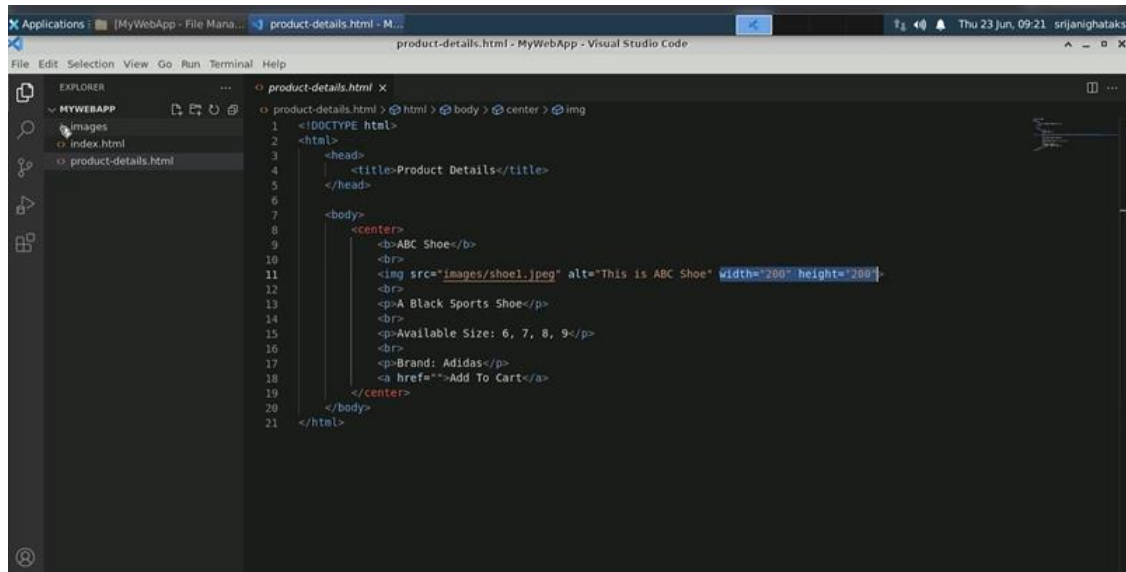

1.2 Select the index.html file to open.

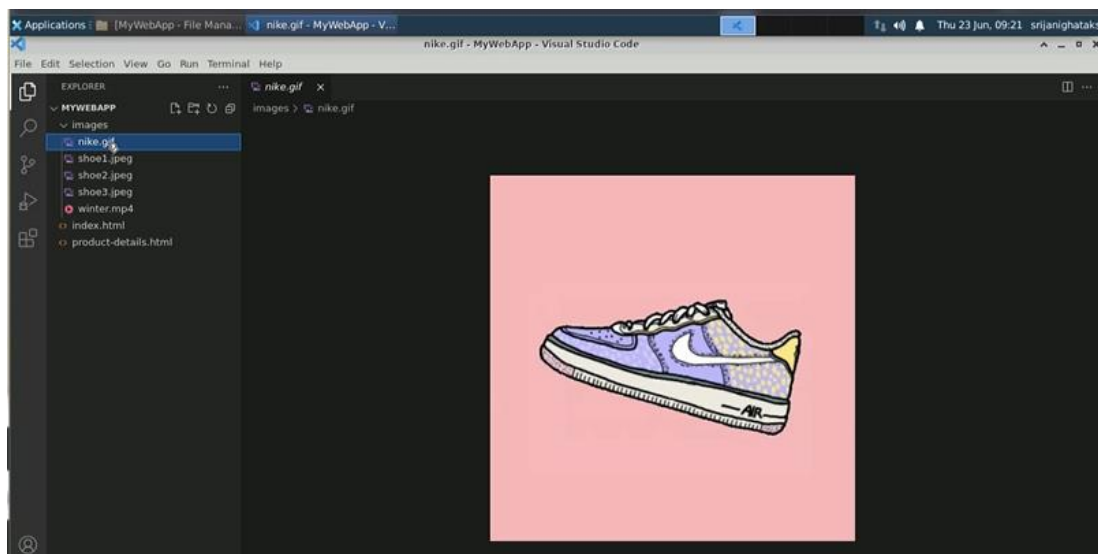

1.3 The code in the file is written to document all the components of the file.

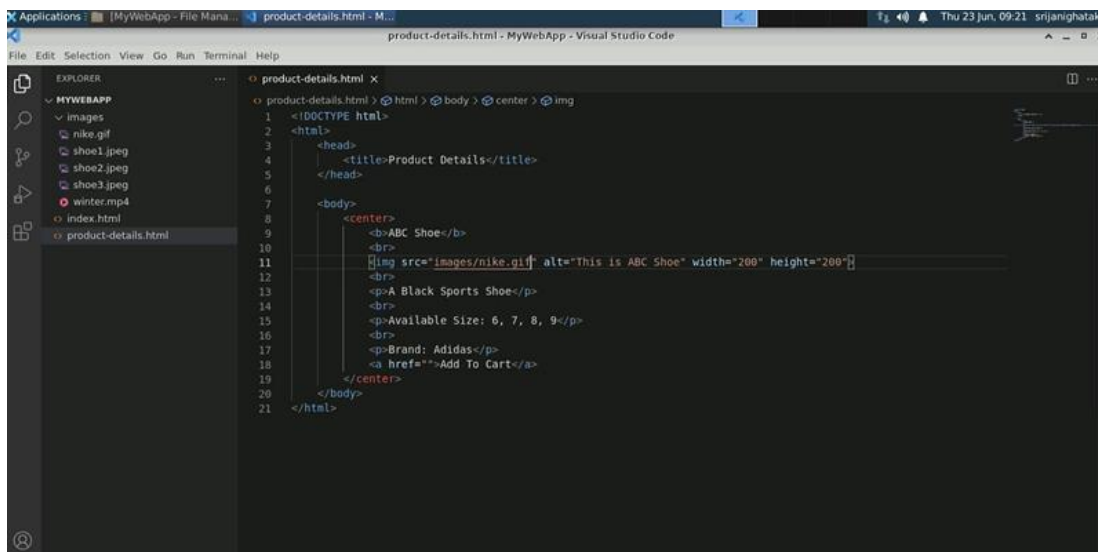

1.4 Double-click on Images to get the list of images.

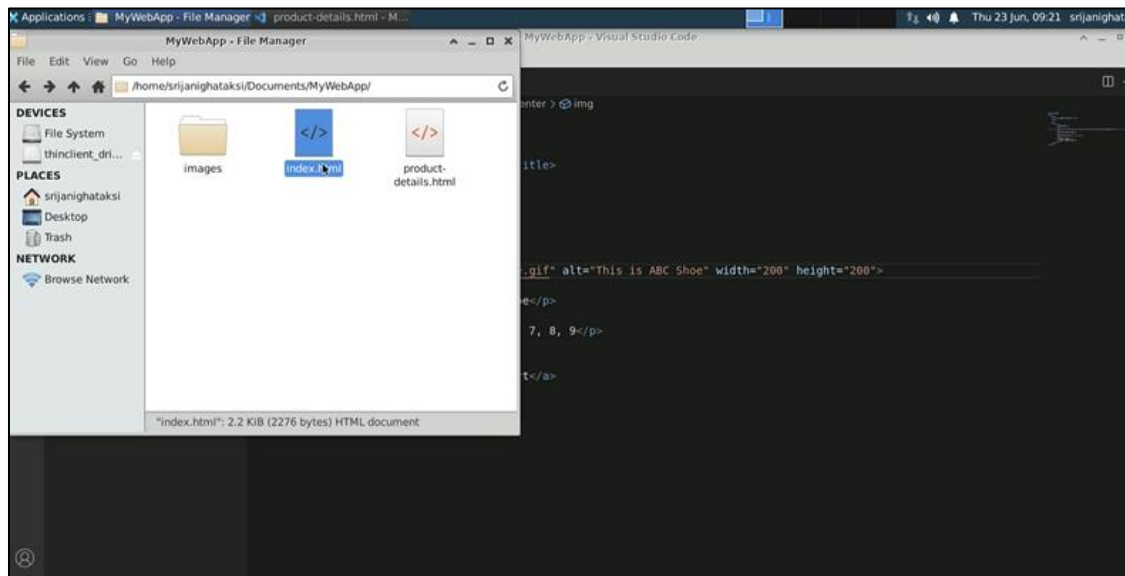

1.5 Check each image from the list.

1.6 Renaming the images of product-details.html page.

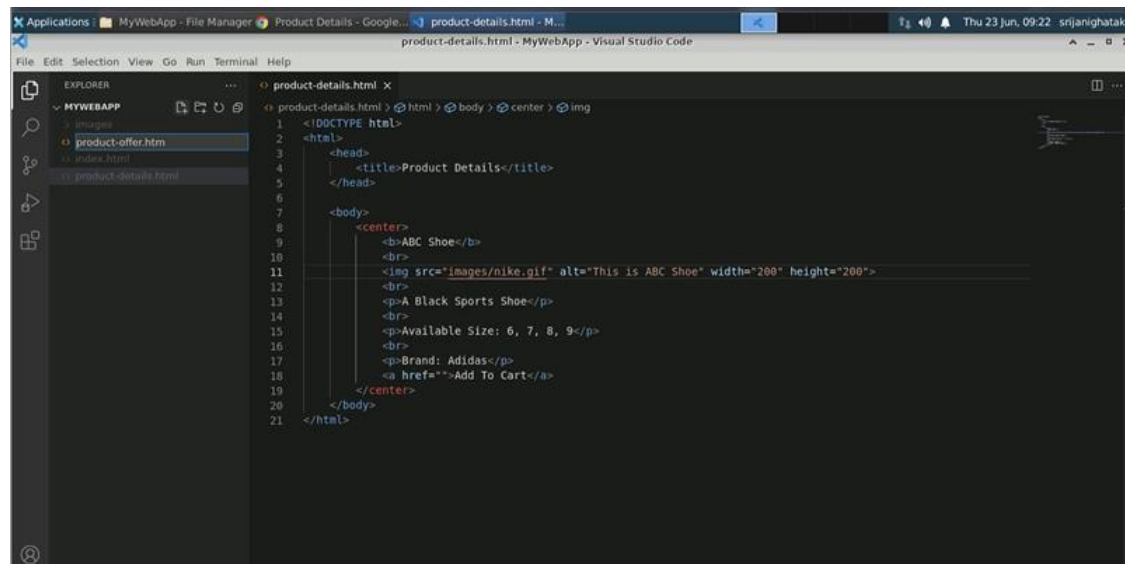

1.7 Check the location where index.html is stored.

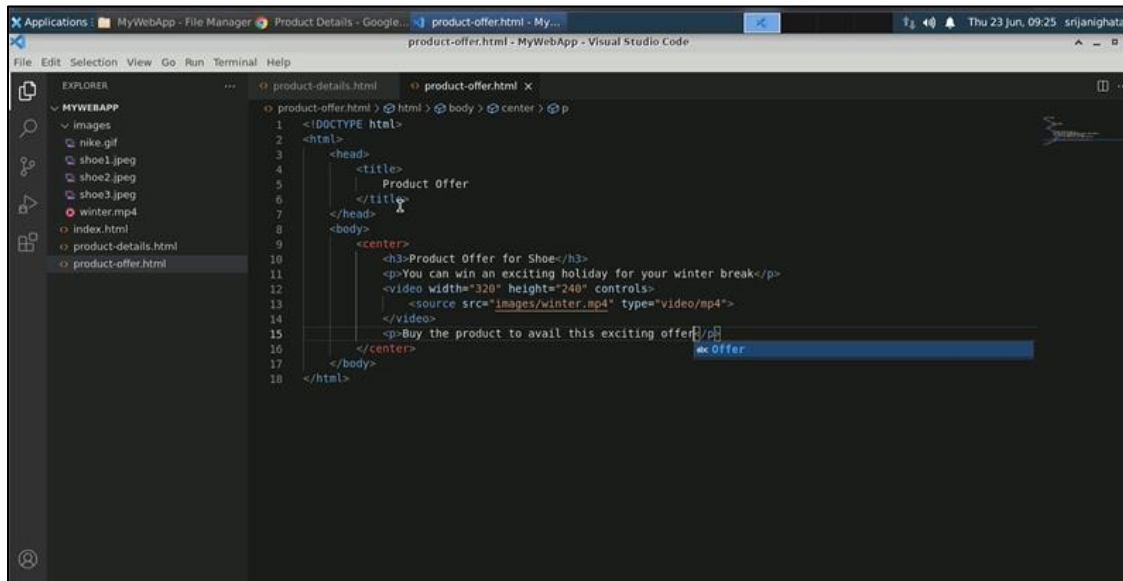

Step 2: Creating a new web page and adding code to the new html file

2.1 Create a new web page named product-offer.html.

2.2 Add the code in the product-offer.html.

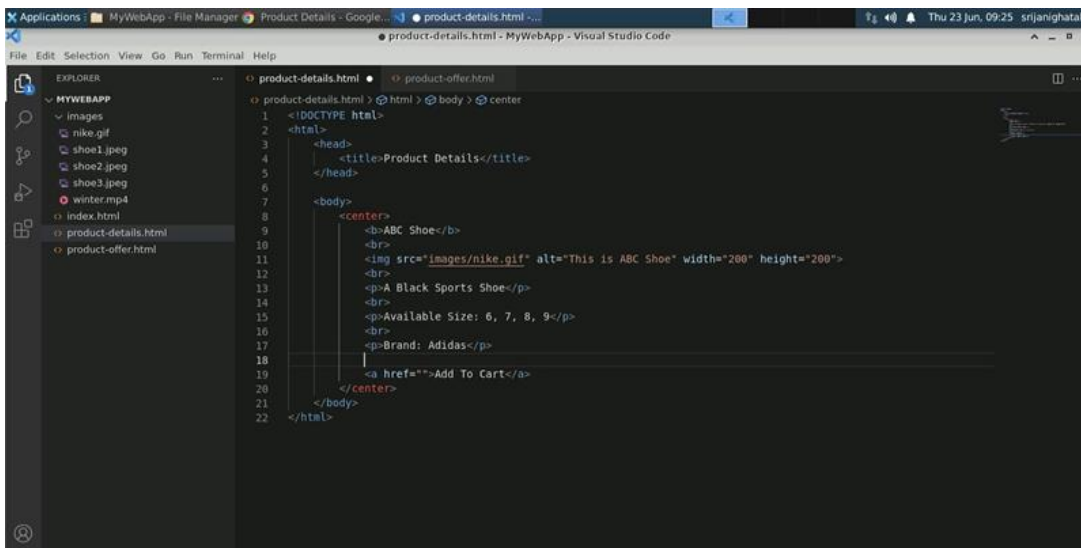

```

1 <!DOCTYPE html>
2 <html>
3   <head>
4     <title>
5       Product Offer
6     </title>
7   </head>
8   <body>
9     <center>
10      <h3>Product Offer for Shoe</h3>
11      <p>You can win an exciting holiday for your winter break</p>
12      <video width="320" height="240" controls>
13        <source src="images/winter.mp4" type="video/mp4">
14      </video>
15      <p>Buy the product to avail this exciting offer</p>
16    </center>
17  </body>
18 </html>

```

Step 3: Updating the product-details.html page

3.1 Modifying the code in the product-details.html page.

```

1 <!DOCTYPE html>
2 <html>
3   <head>
4     <title>Product Details</title>
5   </head>
6   <body>
7     <center>
8       <b>ABC Shoe</b>
9       <br>
10      
11      <br>
12      <p>A Black Sports Shoe</p>
13      <br>
14      <p>Available Size: 6, 7, 8, 9</p>
15      <br>
16      <p>Brand: Adidas</p>
17      <br>
18      <a href="">Add To Cart</a>
19    </center>
20  </body>
21 </html>

```

3.2 Check the product-offer.html webpage.
