Lesson 02 Demo 01

Install Requirements and Test Management App in Jira

Objective: To install requirements and test management App in Jira

**Tools required:** Jira board

Prerequisites: Existing Jira account
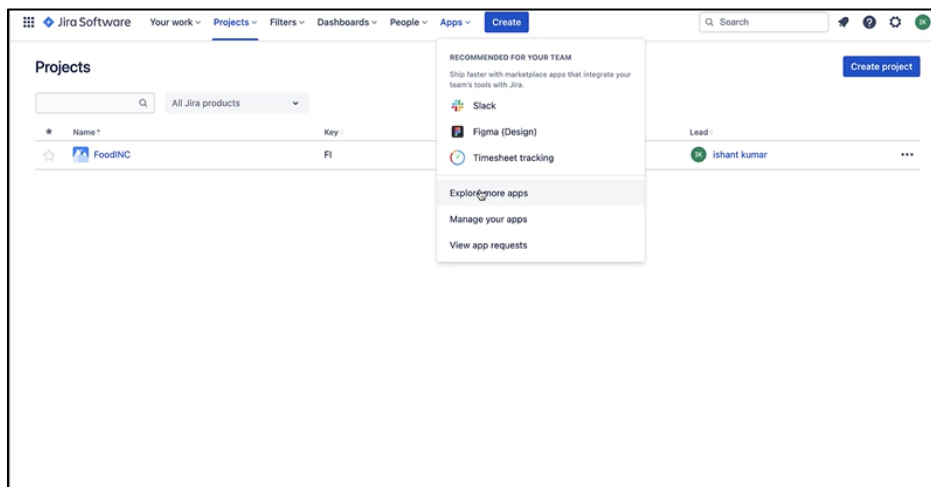

Steps to be followed:
1. Identify RTM and check its components
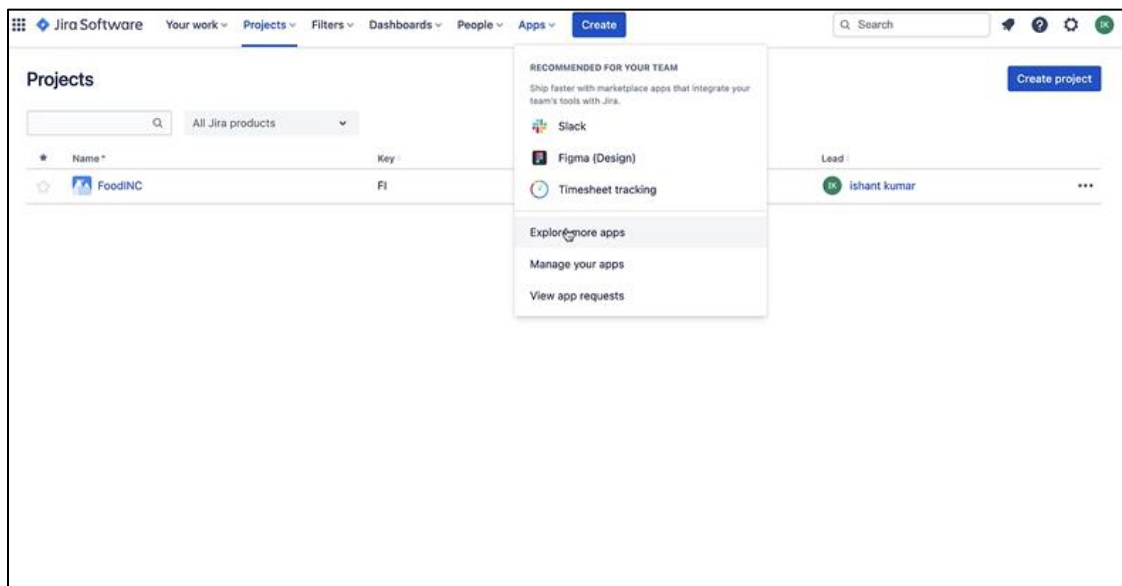

Step 1: Identify RTM and check its components

1.1 Open the dashboard. Check if a pre-existing project is present.
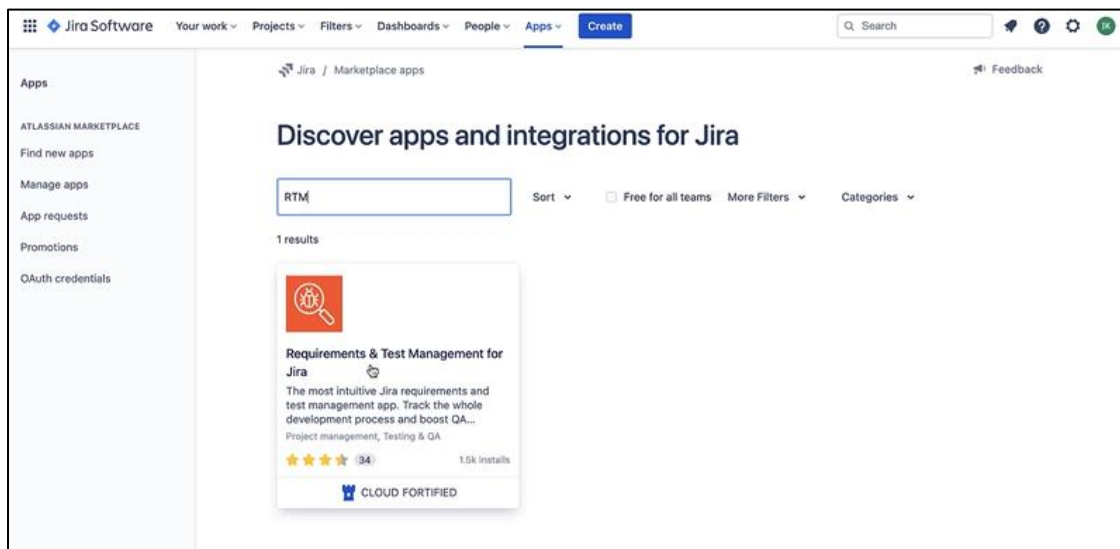

1.2 On clicking **Apps**, a dropdown will appear.

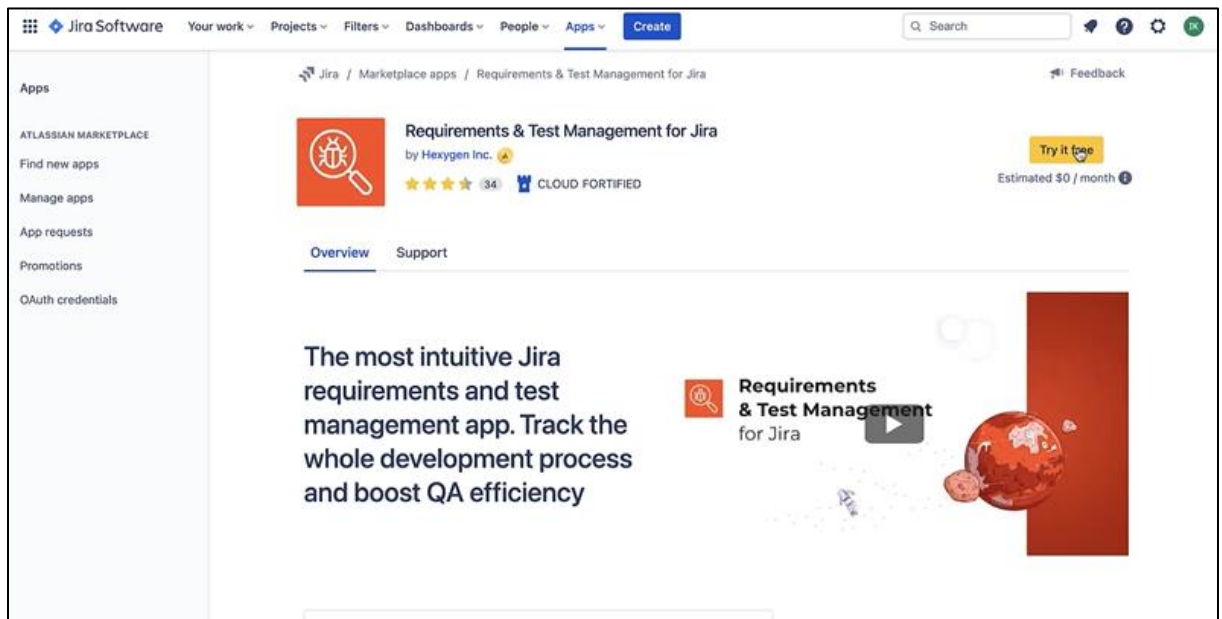

1.3 To check other apps, click on **Explore more apps**

1.4 On clicking **Explore More** Apps, we are navigated to this page.

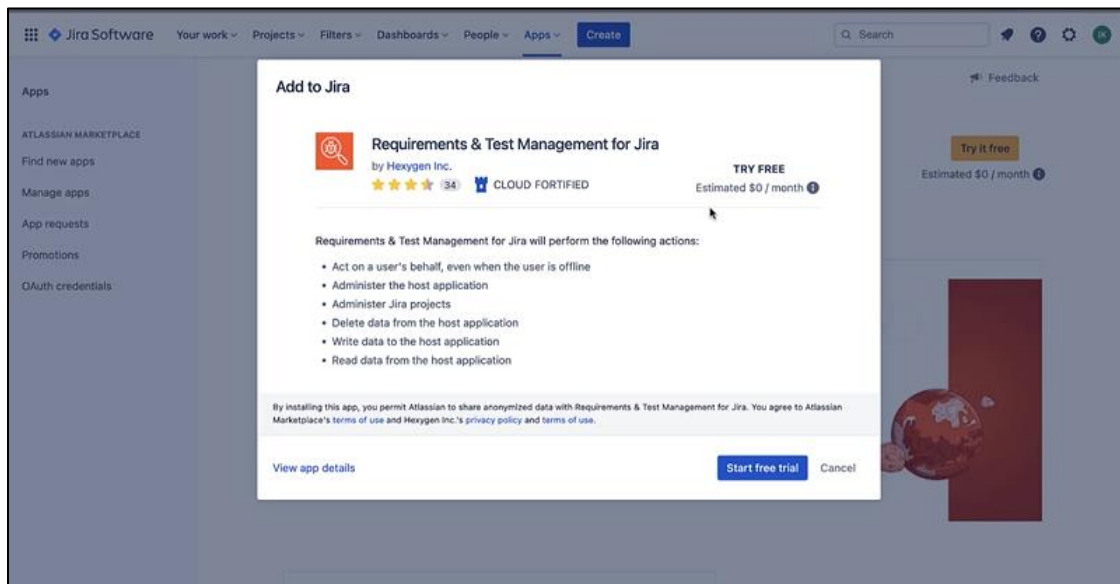

1.5 Type **RTM** in the Search bar

1.6 By clicking RTM, we are redirected to this page.

1.7 To check the components, click on **Try it free.**

1.8 Click on **Try it free** and proceed further with the pop-up window.

1.9 Now the requirements and test management for Jira are being added.

1.10 Then a success message is prompted.
